No. 812

Introduced by Senator De León

February 22, 2013

An act to amend Sections 25178, 25200, and 25200.1 of, to add Sections 25196.7, 25200.20, 25200.21, and 25200.22 to, and to add Article 8.8 (commencing with Section 25199.20) to Chapter 6.5 of Division 20 of, the Health and Safety Code, relating to hazardous waste.

LEGISLATIVE COUNSEL'S DIGEST

SB 812, as amended, De León. Hazardous waste.

(1) Existing law requires facilities handling hazardous waste to obtain a permit from the Department of Toxic Substances Control. Existing law requires an owner or operator of a facility intending to renew the facility's permit to submit a complete Part A application for a permit renewal prior to the expiration of the permit. Existing law requires the owner or operator to submit a complete Part B application when requested by the department. Existing law requires the department to issue a permit if the facility meets specified requirements.

This bill would instead require the owner or operator of a facility to submit complete Part A and Part B applications for a permit renewal at least 2 years prior to the expiration date of the permit. The bill would require the department to issue a final permit decision for an application

for permit renewal within 36 months of the expiration of the facility's permit. The bill would deem an application for permit renewal be denied if the department fails to issue a final permit decision for the application within that time period. The bill would require the department, on or before January 1, 2016, to adopt regulations requiring financial bonds or other security for a hazardous waste facility, and establishing additional specified criteria to be used by the department in its permitting decisions.

(2) Existing law authorizes a hazardous waste facility in existence on a specified date or on the effective date of any statute or regulation that subjects the facility to the hazardous waste permitting requirements to continue to operate under a grant of interim status pending the review and decision of the department on the permit application.

This bill would provide that interim status granted on or after January 1, 2015, terminates 5 years from the date the interim status is granted or on the date the department takes final action on the application for a permit, whichever is earlier.

(3) Existing law requires the department, on or before January 1 of each odd-numbered year, to post on its Internet Web site specified information.

This bill would add certain information that would need to be ~~posted~~ *posted* and would require that the information be translated into Spanish. ~~posted.~~

(4) Existing law authorizes the department to take enforcement actions for alleged violations of any law or regulations regulating hazardous waste.

This bill would require the department, as part of any enforcement action alleging a release of hazardous waste in violation of law, to contract with an independent 3rd party to conduct required testing to verify that the release of the hazardous waste has been abated and the site remediated.

(5) This bill would establish the Bureau of Internal Affairs within the department to investigate any complaint alleging departmental misconduct. The bill would further require the bureau to review policies, practices, and procedures of the department upon the request of the Governor, the Senate Committee on Rules, or the Speaker of the Assembly. The bill would establish the DTSC Citizen Oversight Committee within the department and require the committee to perform various duties, including, among other things, receiving complaints alleging departmental misconduct and referring allegations of departmental misconduct to the bureau, to the Criminal Investigation

Division of the California Environmental Protection Agency, or to another entity, as appropriate.

Vote: majority. Appropriation: no. Fiscal committee: yes.

State-mandated local program: no.

The people of the State of California do enact as follows:

4 as noted in its mission statement, is “to protect California’s people
5 and environment from harmful effects of toxic substances through
6 the restoration of contaminated resources, enforcement, regulation
7 and pollution prevention.”

8 (2) In an effort to protect the public health and minimize
9 environmental impacts, the state requires that each hazardous waste
10 management facility that treats, stores, handles, or disposes of
11 hazardous waste obtain a permit or other authorization from the
12 department.

13 (3) Currently, the department regulates 117 facilities across the

16 expiration dates have passed.

17 (4) One facility operated by Exide Technologies in Vernon,
18 California has been allowed to operate on an interim permit for
19 over 30 years, regardless of its repeated violations of environmental
20 and public health standards.

21 (5) Unfortunately, many communities continue to suffer ~~with~~
22 *from* toxic emissions and releases with limited protection from our
23 current hazardous waste management regulatory system.

24 (6) The longstanding problems at the Exide Technologies facility
25 are only the most recent examples of the system’s failures.

33 requiring that the operator provide financial assurance that the
34 operator can respond adequately to damage claims arising out of
35 the operation of the facility or the facility is exempt from these

40 to the nature and scope of the activity authorized and with respect

1 to any potential risk or injury to human health or the environment
2 from a person or entity that applies for a hazardous waste facilities
